

Table Six Columns and Three Panel with Continuous Interactions with One Discrete

Fan Wang

August 24, 2019

Regression with multiple continuous variables and one discrete variable.
Interact the continuous variables with the discrete variable.

Table 1: Outcome: Before or After

	Continuous: BP and patient are continuous					
	All Age 5 to 12		Girls Age 5 to 12		Boys Age 5 to 12
